

GARAGE DOORS

Coachman® Collection Design 13 with REC14 Windows

ACCENT the beauty of YOUR HOME

A guide to choosing a garage door as beautiful as your home

Clopay, the right choice for your home.

- Clopay is North America's largest and most trusted garage door brand
- A garage door can represent as much as 30% of your home's front façade, which makes choosing the right design especially important – and Clopay has the widest selection available
- Clopay garage doors are designed and manufactured in the USA

*Gallery® Collection Long Panel Design
with ARCH1 Grille Windows*

Design, Visualize and Purchase a New Clopay Garage Door Using Our Web-Based

Upload a photo of your home. See which style offers you the look you want. With just a few simple clicks, you can visualize the transformation and make it a reality.

Whether you choose a door that features the beauty of natural wood or the low maintenance of a composite or metal door, the Garage Door Configurator will help you find your dream door.

HOW TO MEASURE

Measure existing door width and height in feet and inches. This determines the size of door needed. The rough opening should be the same size as the door.

1 Width _____ 2 Height _____

Measure for sideroom: 3-3/4" is required on each side for installation of vertical track for standard extension spring or EZ-SET® torsion springs; 5-1/2" for EZ-SET® extension springs.

3 Sideroom Left _____ 4 Sideroom Right _____

Measure area labeled "headroom" – distance between the top of the door opening ("jamb header") and the ceiling or lowest obstruction (e.g., opener, beams or light fixtures). 10" is required for standard or EZ-SET® extension springs; 12" is required for standard or EZ-SET® torsion springs. If you have restricted headroom, special hardware is available.

NOTE: If door height extends above the opening, the headroom measurement should be adjusted proportionately.

5 Headroom _____

Measure area labeled "backroom" – distance is measured from the garage door opening toward the back wall of the garage. Door height plus 18" is required. Additional backroom may be required for installation of an automatic garage door opener.

6 Backroom _____
